

FLUORINE-CONTAINING POLYIMIDE AND PRODUCTION THEREOF

Patent Number: JP2049029
Publication date: 1990-02-19
Inventor(s): MATSUURA TORU; others: 02
Applicant(s): NIPPON TELEGR & TELEPH CORP
Requested Patent:  JP2049029
Application Number: JP19880200579 19880811
Priority Number(s):
IPC Classification: C08G73/10
EC Classification:
Equivalents: JP2567049B2

Abstract

PURPOSE: To provide a fluorine-containing polyimide having a small thermal expansion coefficient, dielectric constant and refractive index by reacting a specific tetracarboxylic acid anhydride containing fluorine-substituted groups with a diamine.
CONSTITUTION: (A) An acid anhydride of formula I (R1 is a tetravalent organic group of formula II or III) is reacted with (B) a diamine of formula IV (R2 is p-phenylene, group of formula V, group of formula VI, etc.,) to provide (C) the objective fluorine-containing polyimide having repeating units of formula VII.
